Yarmouth (IOW) Harbour Commissioners

Port Waste Management Plan

Introduction

Yarmouth Harbour (IOW) is a small Trust Port. There is a regular ferry connecting it with Lymington on the mainland but otherwise no large vessels use the harbour. Most of the waste is generated by harbour management operations, small commercial vessels such as fishing boats and visiting recreational craft.

The main commercial operator using the harbour are Wightlink ferries. Waste generated within the ferry operations is deposited in their own facilities at Lymington. Passengers generate litter that is collected in the litter bins and then transferred to the skips for disposal via the waste contractor.

Other than the ferries, commercial craft consist of small fishing vessels, hire/charter boats and summer pleasure boats that are licensed to carry up to 12 passengers. Waste generated is mainly general, which goes into the skip. Waste oil is disposed of in the waste oil tank.

The harbour is used extensively by recreational craft consisting of permanent mooring holders and visitors. Waste generated is mainly general, which can be disposed of in the skip and recycled. A tank is provided for small deposits of waste oil.

As a general policy statement, Yarmouth (IOW) Harbour Commissioners encourage all vessels to segregate their waste and encourage the re-cycling of waste.

Charges for the collection of waste are included in the Harbour dues and mooring fees.

Duties and Responsibilities

The Commissioners have a duty to maintain Yarmouth (IOW) Harbour in a condition fit to be used as a port. The Yarmouth (IOW) Harbour General Directions prohibits the discharge into the Harbour of any dangerous or offensive matter. No articles or goods are to be deposited on Commissioners' property without the prior approval of the Harbour Master. A person who fails to comply with the General Directions or Special Directions shall be guilty of an offence and liable on summary conviction to a fine not exceeding level four on the standard scale.

Reporting of inadequacies

Incident/Comment reporting forms are available on request at the Harbour office. Reports are reviewed and logged when received.

Records

Invoices and quantity reports from contractors are to be kept onsite for a minimum of 3 years. Record keeping is the responsibility of the maintenance manager.

Consultation

Yarmouth Harbour Commissioners consult with stakeholders through the Yarmouth Harbour Advisory Committee (YHAC) of which 6 meetings are held a year unless additional meetings are required.
